

Made in Canada

ABB is an international company with a large global presence, but did you know that a significant percentage of the products sold in Canada are also designed and manufactured locally?

ABB's Installation Products division, formerly known as Thomas & Betts, operates seven manufacturing facilities in Canada, six of them in Quebec and one in Alberta

Many of our most well-known brands, including IBERVILLE®, MARRETTE® and MICROELECTRIC®, are products that started in Canada and are still manufactured locally to meet Canadian standards.

Well Made Here

A federally incorporated, non-profit organization collectively formed by banners and professional associations with a mission to encourage the purchase of Canadian-made hardware and home building materials.

Qualified product

An item or material for which at least 51% of the direct costs of manufacturing (materials and labour) were incurred in Canada. Included in the calculation: production, assembly, packaging. Excluded: overheads, research and development, design, transport.

ABB Canada offers several categories of products to its customers, which are manufactured in Canada, including electrical boxes and covers, Iberville brand fittings, a well-known brand here, since it is manufactured at the Saint-Jean-sur-Richelieu plant. We also offer Red Dot and Carlon weatherproof products that are manufactured at one of our plants in Montreal. Marrette brand wire connectors and emergency lighting products are manufactured in other factories located in Montreal. Microelectric meter sockets and accessories are manufactured at our Iberville plant.
